Table 12. Laboratory analysis methods for reservoir bottom-sediment constituents

[USGS, U.S. Geological Survey; GC/MS, gas chromatography/mass spectrometry]

Constituent or constituent group	Analysis method	Method reference
Nutrients	Various methods	Fishman (1993)
Trace elements (USGS schedule 2420)	Inductively coupled plasma-mass spectrometry	Fishman (1993)
Cesium-137 (USGS laboratory code 2307)	Gamma counting	American Society for Testing and Materials (2000)
Pesticides	GC/MS liquid extraction with methanol and water	Mills and Thurman (1992)
